Journal of Electrostatics 40&41 (1997) ix–xiv

Journal of
ELECTROSTATICS

Contents

Foreword
G. Touchard vii

Invited papers

The role of conduction in electrorheological fluids: from interaction between particles to structuration of suspensions
P. Atten, C. Boissy and J.-N. Foulc 3
Contact charging between insulators
G.S.P. Castle 13
Static electricity – an industrial hazard under control?
N. Gibson 21

Full papers

Fundamental

Absolute and convective instabilities in an electrified jet
G. Artana, G. Touchard and H. Romat 33
Two mode EHD stimulation of a conducting liquid jet
B. Barbet, P. Atten and A. Soucémarianadin 39
A nonlinear corrosion double-layer model for laminar flow electrification of hydrocarbon liquids in long metal pipes
P. Fung, H. Chen, G.G. Touchard and C.J. Radke 45
Nonlinear waves in a viscous horizontal film in the presence of an electric field
A. González and A. Castellanos 55
Corona discharges in high pressure air
M. Haidara, A. Denat and P. Atten 61
The contact electrification of polymers and the depth of charge penetration
P.K. Watson and Z.-Z. Yu 67
Theoretical influence of the pressure of the surrounding atmosphere on the stability of high velocity jets
K. Baudry, H. Romat and G. Artana 73
Coulomb correlation effects and pattern formation in electrostatic systems with multistabilities and breakdown
A.A. Berezin 79
Electric field at the discharge tip couples the speed and currents of dart leaders, return strokes and M-components
V. Cooray 85
Transport phenomena in point–plane geometry in dense argon
N. Bonifaci, A. Denat and B. Malraison 91
The study of AC coupled DC fields on conducting liquid jets
Z. Huneiti, W. Balachandran and W. Machowski 97
Electrification of glass substrate surface by plasmas
H. Kitabayashi, H. Fujii and T. Ooishi 103

Bipolar excitation of circular surface waves on dielectric-supported oil films
T.S. Lee and M. Blanco 109
Electrical and chemical model of negative corona in oxygen at atmospheric pressure
F. Pontiga, C. Soria and A. Castellanos 115
Computation of charge and field in a metallic sphere–dielectric flat plate configuration
F. Vila and G. Touchard 121

Liquids

Flow electrification due to the flow of a perpendicular jet on a flat plate
G. Artana, G. Touchard and O. Moreau 129
Destabilisation of water-in-oil emulsions under the influence of an A.C. electric field: Experimental assessment of performance
I.G. Harpur, N.J. Wayth, A.G. Bailey, M.T. Thew, T.J. Williams and O. Urdahl 135
Rose-window instability in low conducting liquids
A.T. Pérez 141
Electrization and electrical conduction of dielectric liquids
B.N. Dikarev, G.G. Karasev, V.I. Bolshakov, R.G. Romanets and I.V. Potapov 147
Streaming current development in a rectangular channel
G. Domínguez and G. Touchard 153
Stability of insulating viscous jets under axial electric fields
F.J. García, H. González, A. Ramos and A. Castellanos 161
Influence of insulator along the plane of symmetry of a blade–plane gap on I–V characteristics in transformer oil
R. Hanaoka, T. Kohrin, M. Kumazaki and T. Takashima 167
Studies of the corona discharge in ehd spraying
A. Jaworek and A. Krupa 173
EHD instability of air/liquid two layer system under unipolar charge injection
D. Koulova-Nenova and P. Atten 179
EHD instability of two liquid layer system with deformable interface
D. Koulova-Nenova 185
Charge accumulation in an oil tank during loading operations
Y. Matsubara, S. Matsushima and T.B. Jones 191
Influence of molecular structure on the propagation of streamer discharge in dielectric liquids
Y. Nakao, H. Nagasawa, R. Yamaoka, H. Itoh, Y. Sakai and H. Tagashira 199
Scattering cell based on ferroelectric nm-particle suspensions
A. Schurian, J. Söder, K. Bärner and J. Lin 205
Spatial distribution function of photoelectrons created by VUV irradiation of 2-2-4 TMP
J.P. Guelfucci, J. Fitte Rey and J. Casanovas 211
Photoionization parameters of photoelectrons created by VUV irradiation of 2-2-4 TMP and cyclohexane at different photon energies
J.P. Guelfucci, M. Brou and J. Casanovas 217

Powders and Solids

Dynamical studies of the single point contact electrification of inorganic and polymer substrates
S. Cunningham 225
Electric charge measurement in pneumatic installations
J.B. Gajewski 231
Triboelectrically charged powder coatings generated by running through holes and slits
W. Kleber and A. Lang 237
Fluidlike surface-wave behavior of a polymer powder layer atop a dielectric sheet triggered through corona charging–discharging
T.S. Lee and M. Blanco 241

The thermal step method: results and prospects
A. Toureille and N. Vella 247
Adhesion measurements for electrostatic powder coatings
H. Stötzel, H.J. Schmidt, D. Auerbach, B. Makin, K. Dastoori and H. Bauch 253
Enhancement of interphase mass transfer by a pulsed electric field
W. He, J.S. Chang and M.H.I. Baird 259
Applications of supersonic injection of electric charges in chemical engineering
J. Taillet 265
Coupling the thermal step technique with the thermally stimulated depolarisation currents technique for the study of polycrystalline alumina
S. Agnel and A. Toureille 271
Contribution to the analysis of the flow electrification process of powders in pneumatic conveyers
G. Artana, G. Touchard and M.F. Morin 277
Space charge measurements by the thermal step method: results in some polymers
S. Malrieu and J. Castellon 283
Electric field detachment of a nonuniformly charged dielectric sphere on a dielectric coated electrode
J.Q. Feng, E.A. Eklund and D.A. Hays 289
Prediction of dielectric energy losses from TSC in polyepoxy
M. Fois, A. Lamure and C. Lacabanne 295
Influence of the tacticity dependent microstructure on the space charge distribution of poly[vinyl chloride]
N. Vella, N. Guarrotxena, A. Toureille and J.L. Millan 301
3D characterization of space charge in a slim insulator by a thermal modulation method
V. Haas, M. Mousseigne and J.L. Franceschi 307
Thermally stimulated currents of pulverized polymers
T. Hori and K. Ikezaki 313
Properties of corona charged plasma vapour deposited PTFE film
R. Kacprzyk and J. Ziaja 319
Electrodynamic control and separation of charged particles using travelling wave field technique
W. Machowski and W. Balachandran 325
Ultra low frequencies study of dielectric relaxation in ferroelectric polyamide 11
C. Maraval, A. Bernes, D. Chatain, C. Lacabanne and J.I. Scheinbeim 331
Reduction of electrostatic charging of particles in pneumatic conveying (patent pending)
I. Inculet, J. Bousquet, C. Briens, E. Duchesne and B. Port 337
The danger of water trees in polymer insulated power cables evaluated from calculations of electric field in the presence of water trees of different shapes and permittivity distributions
I. Radu, M. Acedo, P. Notingher, F. Frutos and J.C. Filippini 343
Stress grading varnishes: a capacitive approach using a nonlinear variation of permittivity
J. Rivenc, M. Biron, T. Lebey, A. Loubière and B. Ai 349
Study of space charge effect on dielectric DC breakdown of synthetic insulators with the pressure wave propagation method
M. Se-Ondoua, D. Malec, N. Zebouchi and T.-G. Hoang 355
Analysis of the material particles behaviour on the surface in the electric field
I.P. Vereshchagin and S.A. Krivov 363
Influence of powder properties on the performance of electrostatic coating process
M.K. Mazumder, D.L. Wankum, R.A. Sims, J.R. Mountain, H. Chen, P. Pettit and T. Chaser 369

Modelling and Measuring Techniques

Factors which affect the corona charging of insulating spheres on plate and roll electrodes
A. Samuila, Al. Iuga, R. Morar, R. Tobazeon and L. Dascalescu 377
A new apparatus for ignition tests with brush discharges
K. Schwenzfeuer and M. Glor 383

Breakdown of liquids: area effect, volume effect or ... particle effect?
R. Tobazéon 389
Numerical modelling of tribo-charge powder coating systems
K. Adamiak 395
Simultaneous measurement of charge and mass on particles
L. Bassani, M. Villani and L. Di Lillo 401
Correlation between direct surface potential measurements by electrostatic voltmeter and indirect method based on an electrical transmission line with distributed parameters
M. Biron, J. Warnant, H.W. Vanderschueren, M. Krecke and R. Goffaux 407
Computation of particle transport in an electrostatic precipitator
B.S. Choi and C.A.J. Fletcher 413
Size of solid contaminants and formation of particle chains: two factors affecting the dielectric strength of insulating gases
L. Dascalescu, A. Samuila and R. Tobazéon 419
3D computation of corona, ion induced secondary flows and particle motion in technical ESP configurations
W. Egli, U. Kogelschatz, E.A. Gerteisen and R. Gruber 425
Internal space charge measurement for the study of the electrostatic phenomena
K. Fukunaga and T. Maeno 431
Dynamic effect of charged particles on the measuring probe potential
J.B. Gajewski 437
Deposition of aerosol particles on a charged spherical collector
A. Jaworek, K. Adamiak and A. Krupa 443
Assessment of industrial electrostatic hazards using finite-element electric field analysis
R.T. Jones, T.J. Williams and S. Abu Shark 449
Measurements of the surface charge density on moving webs
R. Kacprzyk and C. Stec 455
A dual-sensor instrument for simultaneous measurement of surface charges on the two sides of a dielectric layer
T.S. Lee 463
Pressure methods of space charge measurement in dielectrics
E. Motyl 469
Finite element modelling of charged particle dynamics in a seven electrode electrostatic levitator
D.R.G. Rodley, S.J. Belmont, B. Makin and K. Dastoori 477
The principle of operation of a simple electrostatic field measuring device based on the properties of floating electrodes
F. Roman, V. Cooray and V. Scuka 483
Ab initio simulation approach for calculating the effective dielectric constant of composite materials
B. Sareni, L. Krähenbühl, A. Beroual and C. Brosseau 489
Modeling of transient space charge distribution in polymer
N. Zebouchi, M. Se-Ondoua, D. Malec and T.-G. Hoang 495
Computation of mean trajectories of charged aerosol particles in turbulent jets
I.P. Vereshchagin, V.G. Stepanyanz, A.V. Orlov and A.G. Temnikov 503

Hazards

Occurrence of cone discharges in production silos
M. Glor and K. Schwenzfeuer 511
Damage to enamel on stirred apparatus triggered by static electricity discharges of material being stirred
B. Maurer 517
Avoidance of electrostatic hazards during refuelling of motorcars
U. von Pidoll, H. Krämer and H. Bothe 523
The damaging effects of electrostatic discharges from textile surfaces
P. Holdstock 529

Suppression of incendiary discharges occurring between electrified liquid and earthed conductor
T. Kodama, Y. Tabata and T. Inoue 535
Safety evaluation of anti-static flexible intermediate bulk container having non-conductive inner bag
T. Kodama, S. Yamaguma, Y. Tabata and S. Kamachi 541
Some factors influencing electrostatic discharge from a human body
J.A. Strojny 547
Discharge of the carpet type structure antistatized by introduction of conducting fibres
R. Kacprzyk and W. Urbaniak-Domagała 553

Applications

Fuzzy logic in industrial electrostatics
I. Kiss, L. Pula, E. Balog, L.T. Kóczy and I. Berta 561
Interfacial effects and electrorheological forces: Criticism of the conduction model
N.J. Félici 567
Influence of the particle configuration on electrorheological effect
K. Asano, H. Suto and K. Yatsuzuka 573
Control of drug aerosol in human airways using electrostatic forces
W. Balachandran, W. Machowski, E. Gaura and C. Hudson 579
Electrostatic control of flow-induced smearing in the transfer of liquid ink images
J.M. Crowley, H.R. Till, C.A. Radulski and S.K. Ahuja 585
Electrostatic sterility
P. Grabner, I. Berta and A. Iványi 591
Experimental study of electrohydrodynamically augmented pool boiling heat transfer on smooth and enhanced tubes
J. Seyed-Yagoobi, J.T. Hardesty, P. Raghupathi and J.E. Bryan 597
Space charge suppression of electrostatic-induction spray charging
S.E. Law, J.R. Cooke and S.C. Cooper 603
Experimental study on the specific electrical charge of the droplets of a high velocity electrified jet
A. Selenou Ngomsi, H. Romat and G. Artana 609
Multichannel extraction of charged species from liquid with use of track membranes
A.A. Balakin, A.F. Dodonov, L.I. Novikova and V.L. Talrose 615
Charge control agents and triboelectrically-adjusted pigments in electrophotographic toner
R. Baur and H.-T. Macholdt 621
Investigation and analysis of the dynamic trajectories seen within a seven electrode electrostatic levitator
S.J. Belmont, D.R.G. Rodley, B. Makin and K. Dastoori 627
A new production process of powders with defined properties by electrohydrodynamic atomization of liquids and post-production electrical mixing
J.-P. Borra, D. Camelot, J.C.M. Marijnissen and B. Scarlett 633
Particle charge neutralization in roll-type electroseparators
Al. Iuga, M. Mihailescu, A. Cocis and L. Dascalescu 639
Field experiment on the abatement of stock-raising odors by an electrostatic fog-liquefier
M. Jyumonji and H. Uchiyama 645
Removal of NOx from flue gas by corona discharge activated methane radical showers
S. Kanazawa, J.S. Chang, G.F. Round, G. Sheng, T. Ohkubo, Y. Nomoto and T. Adachi 651
Particle precharging and fabric filtration – experimental results of a corona precharger
B.A. Kwetkus 657
Some mechanisms of electric field influence on mass transfer processes in the gas–liquid system
E.P. Maximuk and M.K. Bologa 663
Corona discharge effects on some parasitical insects of cultured plants
R. Morar, I. Suarasan, S. Budu, I. Ghizdavu, M. Porca and L. Dascalescu 669
Electrical decontamination of soil
E. Moreau, P.O. Grimaud and G. Touchard 675

Electrical filters made of polymer materials
A.A. Moshkin and S.A. Moshkina 681
A study on the decomposition of volatile organic compounds by pulse corona
M. Nifuku, M. Horváth, J. Bodnár, G. Zhang, T. Tanaka, E. Kiss, G. Woynárovich and H. Katoh 687
Practical implications of transformer flow electrification studies
J.A. Palmer and J.K. Nelson 693
Static yield stress of ER fluids and the role of electric current
T. Sakai, K. Kobayashi and M. Sato 699
New generation of dry el. filters
V.M. Tkachenko 705
Aircraft engine state nonobstructive electrostatic monitoring: theoretical and laboratory modelling
A.B. Vatazhin, D.A. Golentsov, V.A. Likhter and V.I. Shulgin 711
The polarity of streaming current in water passing through a pyrophylite disc
S. Watanabe, T. Ishikura, T. Yamamoto, N. Hayashi, T. Sumi, Y.W. Kim, D. Dykes and G. Touchard 717
An experiment to purify diesel exhaust gas using an electric trap and three types of catalysers
S. Watanabe, K. Kinoshita, N. Hayashi, A. Ohashi, Y. Uchida, D. Dykes and G. Touchard..... 723
Ion extraction using the electrostatic pseudo liquid membrane technique
T.J. Williams, A.G. Bailey and C.J. Broan 729
Improved electrostatic pinning using a biased, conductive shield
M.C. Zaretsky and J.E. Benson 735
Behavior of ablation wave from functionally graded materials by excimer laser
Y. Uchida, J. Yamada, S. Watanabe, N. Hayashi, H. Furuhashi, Y. Uchida, Y.P. Kathuria and G. Touchard 741
